Professional Experience

Technical Success Manager

CI/CD Solutions Inc.

[Dates of Employment]

- Collaborated with cross-functional teams to optimize build processes and enhance product performance.
- Provided technical support and guidance to clients, ensuring successful implementation and integration of CI/CD solutions.

- Conducted training sessions and workshops to educate clients on best practices and new features.

Projects

Panelli Weather

Developed a weather application using React.js, allowing users to check current weather conditions and forecasts.

Implemented API integration to retrieve weather data and display it in a user-friendly interface.

Deployed the application using GitHub Pages and maintained the codebase on GitHub.

[Link: [Weather App](#)]

Messenger

Created a messaging application with real-time chat functionality using React.js and Firebase.

Designed an intuitive user interface for sending and receiving messages, with authentication and user management features.

Hosted the application on Render and managed code versioning on GitHub.

[Link: [Message App](#)]

Constellation

Developed an interactive web application for exploring constellations in the night sky using React.js and Three.js.

Integrated external APIs to retrieve constellation data and render 3D models dynamically.

Deployed the application on Heroku and maintained the project repository on GitHub.
